# **Section 1. PRODUCT DESCRIPTION**

# TOGGLE ANCHOR WITH EYE HOOK - M-O

Toggle anchor with eye hook M-O is made of steel with zinc chromate coating. It is used for lightweight fixing of interior finish products in cavity materials and plasterboards. The crosspiece forms a large support surface which ensures a very strong and secure fixing.

Types of substrates on which anchor M-O can be installed:

- Clay brick and sand-lime brick
- Hollow clay brick
- Plasterboard

#### Section 2. METHOD OF INSTALLATION

- 1. Original anchors delivered by the manufacturer can be used only
- 2. Before installation identify a substrate in which the anchor will be installed and compare loads which the anchor will carry to the resistance values
- 3. Select adequate anchor length, depending on sum of thickness values of members being fixed
- 4. Holes in plasterboard should be drilled using drilling bits for timber or steel in order not to damage structure of the board
- 5. Diameter of drilled holes should match diameter of the anchors used
- 6. Anchors cannot be installed facing downwards (e.g. in a floor)
