

## PRODUCT DATA SHEET – MOL

### Section 1. PRODUCT DESCRIPTION

#### “MOLLY” STEEL ANCHOR – MOL

Steel anchor MOL is made of steel with zinc chromate coating. It is used for medium duty fixing of interior finish products in plasterboards and chipboards. After being fixed, collapsing arms form a large support surface on the reverse side of the plasterboard. Sharp flange barbs prevent the rotation of anchor shell during fixing which, ensures correct installation.

Types of substrates on which fastener MOL can be installed:

- Plasterboard
- Chipboard

### Section 2. METHOD OF INSTALLATION

1. Original anchors delivered by the manufacturer can be used only
2. Before installation identify a substrate in which the anchor will be installed and compare loads which the anchor will carry to the resistance values
3. Select adequate anchor length, depending on sum of thickness values of members being fixed
4. Holes in plasterboard should be drilled using drilling bits for timber or steel in order not to damage structure of the board
5. Diameter of drilled holes should match diameter of the anchors used
6. Anchor should be installed using “Molly” anchor setting tool HT, cordless or manual screwdriver
